Is this it?

Is this all I can expect from this living lark? Actualizer examines vast existential preoccupations with a worm's-eye view of professional and personal life, elegantly connecting our means to our ends.

It's a soft-spoken, shrewd, funny and touchingly **interactive** seminar on **self-change**.

A dizzying construction that succeeds in accessing emotion through intellectual complexity.

All things change, but only people can choose to change themselves and no organization can change its **patterns** or any other facet of its operation unless its individual members change.

Actualizer presents ways to overcome **self-doubt**, the pervasive experience that causes many talented people to be dissatisfied with themselves and their lives, affecting their fundamental beliefs about themselves.

Actualizer deals with delusions, illusions and **disillusions in the workplace**, blends together **mindtraps** and propellers into a single strain of aching resonance, climaxing with an astonishing to dos pileup.

The dialogue never crackles, the special effects never pop and the action never falters.

If a self-defeating attitude is eating away **job satisfaction** and responsibility. If you're up to some unspecified no-good. Meet your nemesis.
